15. Stitcher Podcast Radio 1.2.14

Stitcher; www.stitcher.com

Slacker is great for music, but it doesn't do podcasts. Enter Stitcher, a podcast client with a twist; it collects groups of similar podcasts together and plays them in sequence as virtual radio stations, so you never run out of content. You can "stitch" together your own channels made up of your favorite podcasts, too. (I think most people call these "playlists.") Stitcher is a streaming program, though, so it kills your battery; if you want to play podcasts for more than a few hours at a time, you'll have to download them and transfer them over from your PC. Stitcher is available in BlackBerry App World.
