

Press Release

Stitcher Now Available for Storm 2

Stitcher today announced the release of its streaming-audio application for the BlackBerry Storm 2 and support for OS v5.0

San Francisco, CA, March 9, 2019 - The wait is over: Stitcher is now available for the BlackBerry® Storm 2™ (9520 and 9550). Additionally, this update will support all BlackBerry touch-screen devices running BlackBerry OS v.5.0. The update is available as a free download from BlackBerry App World™ or at www.stitcher.com/dl.

“We are excited to offer Stitcher to an even wider group of BlackBerry users,” said Stitcher CEO and co-founder Noah Shanok. “As RIM continues to update its smartphone technologies, we want to ensure that BlackBerry users can continue to enjoy Stitcher on the latest devices and operating systems.”

Stitcher was introduced into BlackBerry App World in May 2009 after a successful year as an iPhone app. The app is also available on the BlackBerry Storm™, Curve™ 8300, 8310, 8320, 8900 and Bold™ 9000 and will continue to roll out for additional BlackBerry models as they become available, as well as other new mobile platforms.

Stitcher is set to launch version 1.2 in early July. This update includes improved handling of longer shows, full seek functionality and support for Bluetooth® streaming.

About Stitcher

Stitcher is the leader in on-demand news and talk radio for mobile devices. With Stitcher's free mobile app, users choose the programs they want “stitched” together, and Stitcher then streams that content to the user's mobile device and recommends similar programming. By offering the best in news, sports, talk and entertainment content to users on the go, Stitcher is the easiest way to stay connected – receiving only the information that's most important, in a format that fits into people's busy lives. The company was recently honored with the 2009 “People's Voice Webby” award for Mobile News, and PCMag.com listed Stitcher among the best apps of the year. The app can be downloaded at www.stitcher.com or at the iPhone, BlackBerry, Android and Palm app stores.
